Consultancy

Burslem, Stoke on Trent – Factory Refurbishment

Acting on behalf of Nicholls and Clarke Ltd Neilson Project Services project managed the comprehensive refurbishment of this facility.

The works comprised the construction of a new factory and offices over and around the existing working production plant.

The demolition of the existing building and the commissioning of the new were programmed around the Clientõs annual holiday close down period so that the effects on production were minimised.

Throughout the construction works the existing plant was maintained in operation and the project was completed without the loss of a single productive day.

The project, which involved strict Health and Safety Measures, was completed on time and within budget.
