

## Canterbury High School – Indoor Tennis Centre

Working in partnership with Canterbury High School, and their chosen operator Appeti Tennis Ltd, the Land Group co-ordinated the construction of this new facility.

Expanding its existing facilities to reinforce its Specialist Sports College designation, Canterbury High School developed two new covered indoor tennis courts, a single outdoor court and a floodlit multiple use, hard games area

The development was undertaken using a traditional procurement contract and used a specialist frame construction to provide the indoor tennis court dome.

Project Management was undertaken by The Land Group, from design inception through to completion of construction, through Neilson Project Services Ltd. The project was completed on time and to budget.
