

St James Square, London SW1 – Project Management

This property comprises a Grade I star Listed office building in a prominent location on St James Square together with a six-storey office building fronting Duke Street.

Owned by Clerical Medical the offices required comprehensive refurbishment in order to bring the space up to modern standards.

Managing the Client's professional team Neilson Project Services put together a detailed project specification, oversaw a detailed tender, selected and appointed a contractor and supervised the works.

This £7m refurbishment was completed on time and budget in 10 months.
