

Stanley Dock, Liverpool

Building Consultancy advice in connection with the conversion of these historic listed buildings to residential use.

The property comprises mainly late Victorian buildings within the Stanley Dock including the Tobacco Warehouse, North Warehouse and South Warehouse, the former more than ten storeys high.

Working with the client, Richcliff (UK) Ltd, other members of the professional team and Liverpool City Council we have been evolving proposals for converting these Listed buildings whilst retaining the historic fabric.

Activities undertaken include scheduling parts of the buildings in urgent need of repair, supervising the repairs, scheduling representative samples of the buildings for long term repair including detailing the condition and necessary repairs to original cast iron windows.
